## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5, 8-10, and 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 discloses the creep parameter as the speed of the vehicle but reads "controlling the creep parameter when the brake actuating element is increasingly actuated so that the creep is reduced". It is unclear what is the difference between the creep parameter which is speed and creep itself.

The examiner for the purposes of examination is interpreting the claim as follows:  
The speed of the vehicle is reduced as the brake element is increasingly actuated and this is accomplished by controlling the clutch position.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3683

5. Claims 1, 8-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sasa (EP 375 162).

Sasa discloses a clutch 2, clutch actuator 21, transmission input speed sensor 33, brake pedal sensor 42, engine speed sensor 13, power adjustment actuator 11, controller 5.

See figure 3 for control of creep. Clutch position is linearly varied with brake actuation in order to determine vehicle speed..

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasa.

Sasa is relied upon as above. Sasa does not disclose the specific method of detecting brake actuation (force, position, or pressure). All the claimed methods are well known and It would have been obvious to one of ordinary skill in the art at the time the invention was made to use force, position, or pressure to determine the brake actuation based on factors like cost and reliability and redundancy with other systems like ABS and TCS.
